Marek Hański is an experienced executive with a longstanding background in software development, research and development, and medical technologies. He graduated from the Faculty of Mathematics and Information Science at the Warsaw University of Technology. He began his professional career as a software developer. Since 2008, he has been associated with Medicalgorithmics S.A., where he has contributed to the development of the company's key technological solutions, including successive generations of the PocketECG system and the DeepRhythm Platform. He has been responsible for the execution of R&D projects, product development, as well as the company's IT infrastructure and information systems.

Throughout his career, he has focused on creating innovative solutions that support cardiac diagnostics, combining technological expertise with a strong product and business-oriented mindset. He has extensive experience in leading multidisciplinary teams, managing complex technology projects, and implementing solutions deployed across international markets. He also has significant experience in coordinating cross-functional collaboration at the organizational level.
